

## TERMS OF USE

### 1. Registration and participation

Check in. To begin participation, registration on our website is required. One user can have only one account in the system. The creation of a new account will lead to the liquidation of the existing funds without the right to reimburse it.

Registered user must be at least 18 years old.

The user invests exclusively through a personal account.

The administration has the right to independently refuse to participate to any user at any time without giving any reason.

For any violation of the rules or a threat to the administration, project or other participants, the user may be blocked.

It is possible (but not obligatory) to pay the face value (face value = the entire set of user deposits— (minus) all profit earned on deposits).

There are no warranties or obligations. The user makes the decision to create deposits consciously, voluntarily, at his own risk.

By agreeing to these rules during registration, you automatically confirm that you agree with each paragraph of the rules, that you act consciously and voluntarily, and that your use of this website does not violate the laws of your state. In other cases, we ask you not to register, as it is subject to blocking. Please do not make such registrations.

### 2. Investment plans

Each investment plan consists of a contribution, deposit term and payment. First, the user makes his contribution, and then he gets paid. The funds of user deposits are not collected anywhere and are not stored in the accounts of the project. Deposits from some participants immediately go to payments according to the plans of other participants. As long as the amount of deposits exceeds the amount of payments according to plans, the project will work with payments of investments and profits for each user.

One participant can simultaneously have an unlimited number of deposits for any variation of investment plans.

The term, depending on the plan, can vary from 15 days to 365 days.

Profitability of plans depends on the investment plan, the term and amount of the deposit. The longer the plan term and the deposit amount, the higher the return.

Profitability is not a constant value: as the project develops, profitability is adjusted.

Accrual of interest on deposits is calculated and credited to the user's account at the end of the investment period for investment plans that provide for a one-time payment at the end of the term (plans 4 and 5) and daily for investment plans that indicate the amount of payment per day. The initial deposit amount is not included in the profit in investment plans that provide for a one-time payment at the end of the term (plans 4 and 5), it will be returned at the end of the deposit term. The initial deposit amount is not included in profit (will be returned after the deposit expiration date) in investment plans that indicate the amount of payment per day.

The user makes a deposit only by replenishing his balance in the Personal Account (LC) and through the payment systems NixMoney, Perfect Money, Payeer, so the user needs to have accounts in one of these systems. In addition, the contribution can be made using Bitcoin and Zetcoin wallets.

Payment is made to the user's balance. In order to request a payment from the balance to your wallet in the payment system, you need to open an account in one of the supported payment systems: NixMoney, Perfect Money, Payeer - or Bitcoin or Zetcoin wallet. Payment to the wallet occurs at the time of withdrawal of funds. In case of technical malfunctions, the payment period can be extended up to 2 days. The minimum withdrawal amount is 500 rubles, \$ 10; 0.00600000 ZEC; 0.00060000 BTC.

### **3. Affiliate program**

The affiliate program of the project is represented by three levels. More details can be found in the "Affiliate Program Rules" (see below).

Unsolicited emails of any kind are prohibited. Spamming a user account is blocked. The user is recommended to check the Spam folder in his mail to check the delivery of the letter from Cryptodolau.

### **4. Risks**

The work of the project depends on user activity. As long as the amount of deposits exceeds the amount of payments according to plans, the project will work with payments of investments and profits for each user.

Users create deposits on their own right to manage their funds free of charge, definitively and irreversibly, without any guarantees. Participation in the project is carried out voluntarily, at your own peril and risk.

Due to the international nature of the project, it is affected by global catastrophes. Phenomena such as global financial crises, a massive stoppage of major payment systems or the entire banking system as a whole can lead to malfunctions in the project or to a complete halt.

Cryptodolau is not responsible for any loss caused by sharing passwords or identity theft. It is strongly recommended that each user securely store their data necessary for authentication and access to their personal profile, mail and settings.

The project is constantly evolving and these rules may change depending on changes in the conditions of the project. Information about the changes is published on the site. Changes to the terms and conditions come into force from the date of publication of information on the site, unless otherwise provided in the text.

## AFFILIATE TERMS & CONDITIONS

Anyone can become a member of the affiliate program. To do this, it is enough to register on our website and attract additional participants through the placement of banners and an individual referral link.

The accrual of funds for attracted investors is due to partners solely for the personal recommendations of the project, and not for "sponsorship" and assistance. The inviting partner is not required to help their invitees.

A partner receives a partner reward - a percentage of all contributions of his 3-level structure. Depending on the level at which the participants are located, the amount of partner remuneration is set in percent:

- level 1 - 5%,
- level 2 - 2%,
- level 3 - 1%.

Affiliate rewards are credited to the partner's balance as soon as his invitee has made a deposit. This happens at the moment when the funds are debited to pay the deposit.

After the affiliate reward is credited to the balance in your account, the partner can withdraw earned money through payment systems.

A partner receives a reward only for those members of his structure who participate in the system personally, and not through intermediaries or representatives. Otherwise, the Administration may unilaterally refuse to participate in you, without paying affiliate fees.

The new member is assigned to the partner whose last recommendation registered the new member or whose partner link was the last transition.

- If a potential participant clicked on the site through various affiliate links, then the partner at the time of registration will be the person whose link was used to complete the transition that ended with registration.
- If the link was through an affiliate link, then during registration the field for changing affiliate login is not available.

- Thus, by clicking once on the affiliate link, the potential participant, in any case, is fairly assigned to the partner. Moreover, if a potential participant closes the site and after a while visits the site again, then information about the partner will be saved. The cookie data is stored for 365 days.

Change of a higher partner or transfer to another structure is prohibited.

Using SPAM, you cause serious damage to the site and the project as a whole, which leads to the blocking of the domain and the site itself. You should not use SPAM and other illegal methods to advertise your affiliate links. Otherwise, the Administration reserves the right to unilaterally refuse to participate in you without paying affiliate fees.
